

TEADIT SOLUTIONS

To Support

Energy Transition

THE FUTURE IS ALTERNATIVE ENERGY RESOURCES

The research and investments in renewable energy resources have never been more prevalent than now. Industry, as well as governments worldwide, are driving Energy Transition projects to reduce the impact of climate change and are requiring innovative solutions in different areas to tackle this.

Teadit, as a leading manufacturer with a mission "sealing for a safer and greener tomorrow", is engaged in supplying products to support this transition. With our well-equipped lab, and highly qualified team, we are capable of testing seals at different conditions with a variety of media, including small molecule gases. Be it on an electrolyzer, battery, vent or fuel cell, Teadit has the technology to meet your needs.

Several ongoing industrial projects already rely on our green energy solutions.

Please get in touch and your request will be addressed by our expert support team.

WHAT WE CAN OFFER

- ✓ A Global Team of Esteemed Engineers, Focused on Energy Transition
- ✓ PTFE Solutions for Electrolyzers
- ✓ Seals for Energy Storage Systems
- ✓ Membranes for Venting Applications
- ✓ Hydrogen Compatible Sealing Solutions
- ✓ And much more!
